“70% of today's production is coming from matured fields as the easy-oils are gone. If we consider the first & basic thing that would be able to prolong the life of a reservoir without incurring any specific cost, it is the ability to predict the type & quality of reservoir, what does it take to manage as well maintain the reservoir and how to build the production profile.”

“The integrated energy trade show held from March 4-6, 2020 in Mumbai was a splendid show by Chemtech Team. It was an unique occasion combining knowledge platform with a vast networking platform. There was extensive arrangement to host a huge gathering from diverse fields of work. In spite of this large magnitude, everything was very orderly. This was possible for the hard work of the organizing team. All the delegates of OIL family are immensely benefitted by this show.”
